UNDERLINE TEXT TO BE ADDED

Revise Section 1014.2.1 to read as follows:

1014.2.1 Two exits or exit access doorways. Where two exits or exit access doorways are required from any portion of the exit access, the exit doors or exit access doorways shall be placed a distance apart equal to not less than ~~one-half~~ one-third of the length of the maximum overall diagonal dimension of the building or area to be served measured in a straight line between exit doors or exit access doorways. Interlocking or scissor stairs shall be counted as one exit stairway.

Exceptions:

1. Where exit enclosures are provided as a portion of the required exit and are interconnected by a 1-hour fire-resistance-rated corridor conforming to the requirements of Section 1016, the required exit separation shall be measured along the shortest direct line of travel within the corridor.
2. Where a building is equipped throughout with an automatic sprinkler system in accordance with Section 903.3.1.1 or 903.3.1.2, the separation distance of the exit doors or exit access doorways shall not be less than ~~one-third~~ one-fourth of the length of the maximum overall diagonal dimension of the area served.

Anticipated impact of code change on cost of construction (CHECK ONE)

☐ **Increase** ☒ **Decrease** ☐ **Negligible** ☐ **Unknown**

If "Increase" box was checked, indicate estimated range of added cost:

Per 1,000 SF single-family dwelling	\$		to	\$	
Per 1,000SF of commercial building	\$		to	\$	

JUSTIFICATION OF CHANGE:

The requirements are inappropriate provisions due to local conditions/building constraints particularly site conditions and urban planning. This provision hampers the economic development of the District without clearly contributing to the safety, health and welfare of the building occupants or population at large. The proposed amendments provide a reasonable degree of protecting the safety, health and welfare of the building occupants or population at large.
